

Salon DIGITAL®

The newly updated, slimmer, range of Portrait Digital Posters offer a modern and stylish method of media display. They are a complete digital signage solution and thanks to their built in media player they require no additional hardware such as PCs, DVD players, excess cables or software; you simply plug and play.

Their sleek, elegant tempered glass styling, ability to be in constant use, wide viewing angle, high brightness and unbranded, buttonless design are just a few reasons why our Digital Posters are used over home TVs for commercial display. An eco-friendly power timer allows the user to set the display on and off times during a week, resulting in lower power consumption and running costs. A free portrait wall mount comes as standard.

Applications for these practical displays are diverse and include retail locations such as supermarkets, department stores, drug stores, show rooms and shopping centres as well as banks, bars, cafés, gyms, art galleries, salons, train/bus stations, travel agents, hospitals, schools, museums, exhibition displays, cinemas and conference halls.

Our products use a straightforward plug and play system. Simply load the content in the order you want it to be displayed onto a USB stick. Insert the USB stick into the LCD screen, wait for the data to load, remove the USB stick and your images, videos and music will be displayed.
